June 8, 2021

NEXT Trucking has launched its Customizable Reports tool for freight tracking.

NEXT Trucking has launched its Customizable Reports tool for freight tracking. A new feature within the company's recently launched Shipper Portal, Customizable Reports offers a way to receive, download and share container information across the supply chain.

With a comprehensive range of filters and data fields, Customizable Reports is designed to provide transparency and visibility. Users have immediate access to an intuitive and fully customizable reporting tool, with options to create, edit, distribute and schedule recurring reports on NEXT's secure, proprietary platform.

With automated scheduling features, Customizable Reports allows Shipper Portal users to:

- Download fully-customized reports as CSVs.
- Share reports within a secure, digital platform.
- Freely edit data fields, time ranges and filters for each report.
- Automate and schedule distribution via e-mail.
- Adjust reporting frequency and delivery method.

Users can access Customizable Reports directly within the Shipper Portal.
